

AUTOMATIC ENCLOSED EXTENSION REELS FOR HOSE

TF2K - TF3K

Compressed air, water

A white, semi-circular automatic enclosed extension reel (TF2K) mounted on a blue tiled wall. It features a black hose inlet on the left and a black hose outlet at the bottom. The reel is partially unrolled, showing the internal mechanism.

TF2K

APPLICATION

For workshops, maintenance services, building site, installers, etc...

- Extend the life-span of hose
- Ensure the safety of personnel
- Eliminate dangerous hose on the floor
- Avoid knotting of hose
- Protect hoses and tools from impact damage

CONSTRUCTION

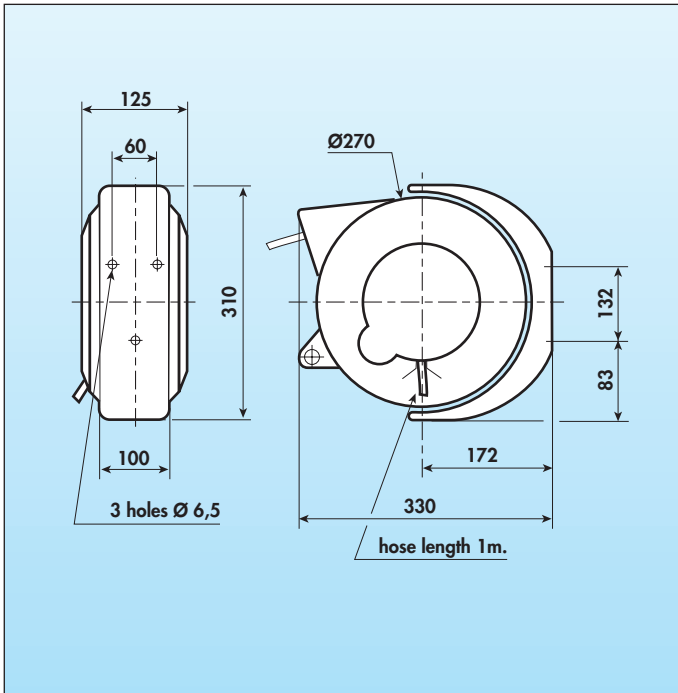

- Steel casing on TF3K
- ABS casing on TF2K
- Fited with swivel brackets
- Internal roller guide
- Rotary joint
- Working pressure up to 15 bar, depending on the model
- Rewind springs housed internally
- Ratchet and adjustable hose stop
- Epoxy paint finish on the TF3K

A blue, cylindrical automatic enclosed extension reel (TF3K) mounted on a blue tiled wall. It features a black hose inlet on the left and a white hose outlet at the bottom. The reel is partially unrolled, showing the internal mechanism.

Example: TF3K 091612 AC/EA

Reel fitted with ratchet, equipped with 12 m of compressed air/water hose of diameter 9 x 16 mm

AUTOMATIC OPEN EXTENSION REELS FOR ELECTRICAL CABLE

LO2K - LO3K - LO4K

LO2K

LO3K

LO4K

APPLICATION

For workshops, maintenance services, building sites, installers...

- Extend power closer to work area
- Extend the life-span of your cables
- Ensure the safety of personnel
- Avoid knotting of cables

CONSTRUCTION

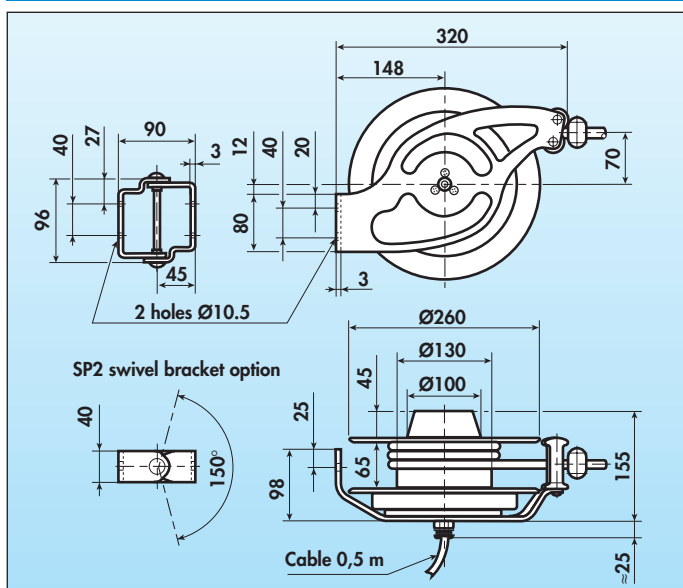

- Steel drum body
- Fitted with standard H07 RNF cable
- Fixed bracket
- Adjustable roller cable guides on LO3K and LO4K
- On model LO2K, 16A slipring fitted in steel housing, max. voltage 440 V ac / 220 V dc
- On model LO3K, 24-50A slipring fitted in polypropylene or steel housing, max. voltage 500V ac / dc
- On model LO4K, 24-50A slipring fitted in steel housing, max. voltage 500 V ac / dc
- Level of protection: IP 55
- Rewind springs housed internally
- Ratchet and adjustable cable stop
- Epoxy paint finish

OPTIONS

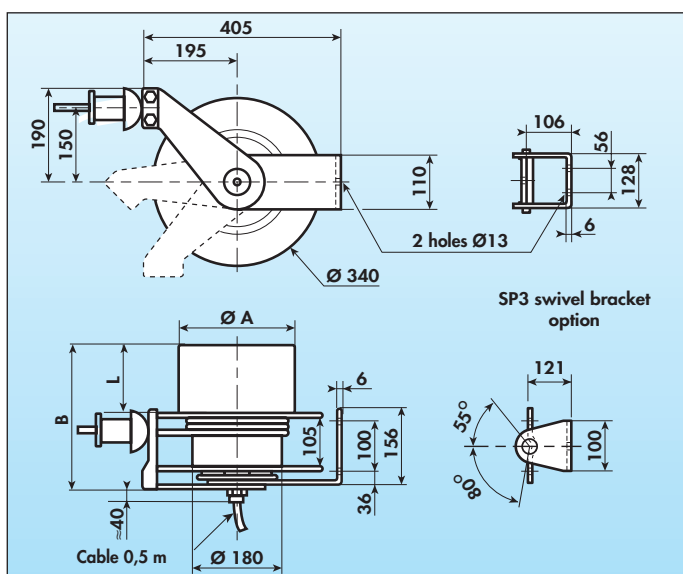

- Swivel brackets on all models

LF2K

LF3K

APPLICATION

For workshops, maintenance services, building sites, installers...

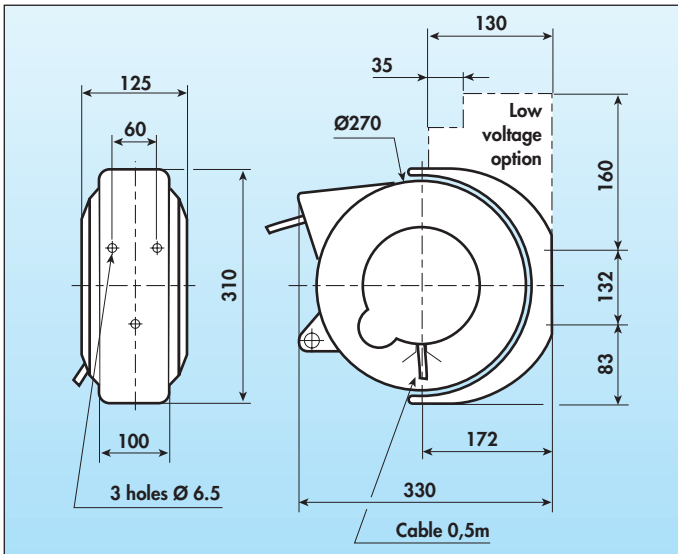

- Extend power closer to work area
- Extend the life-span of your cables
- Ensure the safety of personnel
- Avoid knotting of cables

CONSTRUCTION

- Steel sheet casing on LF3K model
- ABS casing on LF2K model
- Fitted with H07 RNF or H05 VVF cable
- Complete with swivel brackets
- Roller cable guides on LF2K and LF3K models
- 500V ac/dc – 30A slipring on LF3K model, in a polypropylene housing
- Level of protection: IP42 on LF2K and IP 55 on LF3K
- Rewind springs housed internally
- Ratchet and adjustable cable stop
- Epoxy paint finish on LF3K

EARTH BONDING REELS

MALT

MT2K - MT3K

MF3K

MO2K

MO3K - MO4K + 100A safety clamp option

APPLICATION

To provide a temporary earthing connection:

- Either for the elimination of electrostatic charges (e.g. fuel supply vehicles)
- Or to provide protection to individuals by removing fault currents (e.g. mobile generators)

CONSTRUCTION

- Robust steel construction
- Swivel model with metal pivot or fixed model supplied with fixings manufactured from insulating material
- Roller guide
- Rewind springs housed internally
- Ratchet and adjustable cable stop
- EPOXY paint finish
- Single core, flexible durable cable with PVC green/yellow sheath

DESCRIPTION

- For electrostatic charges, a section of 4mm² or 6mm² is sufficient
- For the protection of individuals, refer to table 1 – Article 5.2 of norm EN 60204, below.

Installation PHASE conductor section (mm ²)	EARTH conductor section
$S \leq 16$	S
$16 < S \leq 35$	16
$S > 35$	S/2

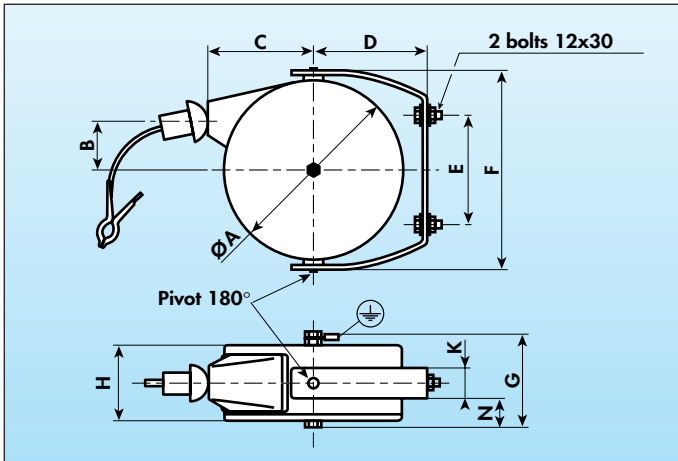

INSTALLATION

- Our reels are delivered assembled and ready for use. They simply require attachment to a vertical support and then the necessary cable connections need to be made
- Terminals are used to connect the cable to the reel
- Connections at the ends of the cable:
 - electrostatic charges: by 100A petroleum clamp, in conformity to NFN88070 – passed on 09/11/1972
 - protection of individuals: by terminal (clip at the end of the cable to be unwound)
- In accordance with the intended usage, please refer to the instructions

OPTIONS

- Self-opening, 100A safety clamp
- Swivel brackets on open models

INDUSTRIAL REELING DRUMS WITH ELECTRICAL CABLE FOR MOBILE MACHINES

EXEL

To power and control mobile machines (overhead cranes, hoists, gantry cranes, lighting rigs, etc.).

EXEL 1

EXEL 2 + SE/BR

EXEL 2 + SP

APPLICATION

- To supply power and control to mobile industrial machinery
- Installation can be to a fixed point or to a mobile piece of machinery, and the cable can be supported or unsupported, with cable retrieve or vertical rewind.

CONSTRUCTION

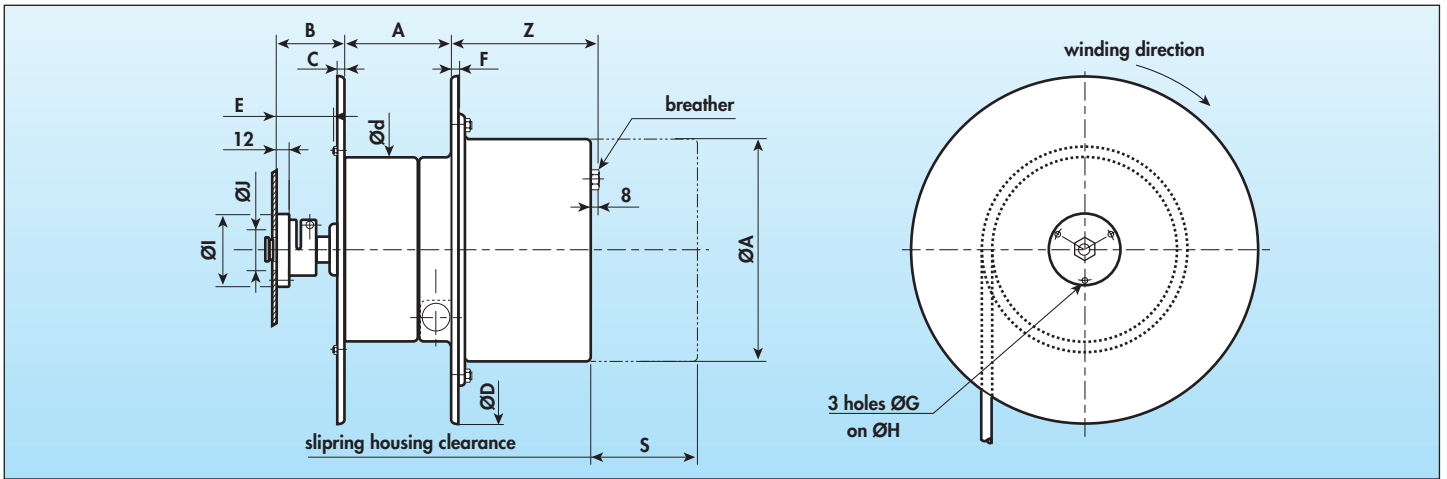

- Steel drum body
- Mounted on permanently sealed roller bearings
- Advanced technology incorporating an automatic spring release and return system
- Slipping installed in steel external housing
- Easy access for maintenance purposes

PROTECTION

- Varnished, zinc-plated finish, all internal parts treated
- Level of protection: IP 55
- Profiled gland and seal system

OPTIONS

- Fixed bracket, roller guide and swivel bracket (Epoxy paint finish)

RETRACTABLE BARRIER REELS

P.N.

Sample 20 PN 12

Sample 14 mtr Pit kit

APPLICATION

- For road, rail, work-site, factory, airports, etc.

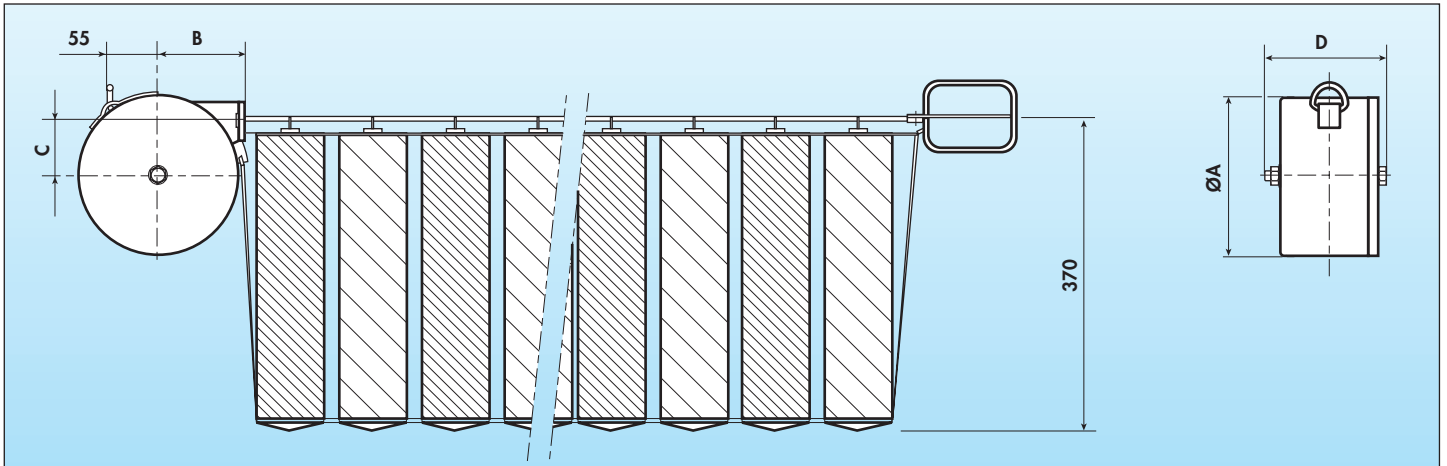

CONSTRUCTION

- Steel casing
- A water repellent material banner, made up of vertical red and white alternate bands, is held up by a steel rope and runner, using the rings attached
 - One end of the banner is fixed to the reel, the other to a handle
- Rewind is by internally housed springs
- Epoxy paint finish

OPTIONS

- Banner reflectors
